Cyberport is a prime office tower with elegant and spacious environment, inspirational and creative setting, as well as equipped with grade-A office facilities including advanced VRV air-conditioning system, built-in raise floor with cutting-edge IT and telecommunications facilities.

Headline

In order to meet our tremendous business growth, cater for our business development strategies and accommodate the increasing business activities with diversity as well as expanding manpower, our management considered it as the right moment to move to a new premise to build our better foundation for long term growth.

The new office provides not only more space provision for growth, it also allows us to set aside a dedicated staff area for colleagues' gathering during lunch and tea breaks. Our work efficiency has been improved in this comfortable environment.

We are neighbor of international well-known companies. It is convenient for us to drive collaboration and innovation through connecting with them in order to create more business opportunities in Asia and other countries.

Having in charge of the office relocation project, our Group General Admin Manager Ms. Alice Cheng commented, "With 5 months of collective efforts by Group General Admin, MIS team, colleagues, designers, vendors and contractors, the relocation project has been successfully accomplished. I would like to express my greatest gratitude to all of our colleagues contributing to this office relocation project. I enjoy working in the new office; there is enough space for meeting, enabling us to communicate effectively to uplift our working efficiency."

Our Group Chairman Mr. CS Ng said, "We are now well prepared for coming huge opportunities. We believe people are the key factor for success. We value our staff, care their working environment and endeavor to provide them with comfortable working environment to stimulate their innovation and productivity."

Business Highlights

Visitor Management System of HKTDC benefits to over 600,000 trade buyers every year

Leveraging C&T's in-depth expertise in delivery mission-critical applications, HKTDC's new Visitor Management System (VMS) developed by C&T has been successfully launched to production on 8 May 2014. The new VMS has uplifted HKTDC's operational efficiency and service quality, enabling them to maintain their leading position in exhibition industry and create significant value for buyers and exhibitors so as to build Hong Kong's economic success.

Business Highlights

Visitor Management System of HKTDC benefits to over 600,000 trade buyers every year

The new VMS aims to benefit over 600,000 trade buyers being served by HKTDC every year. HKTDC's on-site registration process has now been further enhanced and it is simple, speedy and convenient. The new VMS also provides new "mobile registration", onsite-self-service kiosk to improve user experience. Besides, it also comes with enhanced input and search functions for better visitor records management and utilization to support HKTDC in fostering more business opportunities for Hong Kong companies.

Internal operations of the Council are also benefited by the new VMS. For example, it shortens the collecting data and generating reports time, and enriches the VMS network architecture and report function.

Production Rollout of ERKS for GRS enhances the overall government operation efficiency

C&T Solutions has successfully rolled out the electronic recordkeeping system (ERKS) for the Government Records Service (GRS) in May 2014.

Before the e-Government era, there is no proper electronic recordkeeping system, all records have to be printed for filing and managed in paper files. In order to improve this circumstance and meet the needs, GRS plans to implement an ERKS in its organization to manage both electronic and non-electronic records including electronic mails (e-mails), paper records, microfilms, spreadsheets, images and text documents.

(Source: GRS website)

GRS' ERKS enhances the overall government operation efficiency

Business Highlights

C&T was entrusted by GRS and OGCIO to take charge of the overall ERKS project management, taking the lead in coordinating various parties, resolving conflicts and crisis, overseeing the progress of various activities, reporting progress regularly and thus ensuring a satisfactory service delivery.

The ERKS for GRS manages electronic records and non-electronic records in an integrated and consistent manner to enhance the overall Government operational efficiency, enhances better governance and greater accountability of GRS, improves organizational compliance, reduces cost and ensures the authenticity, integrity, reliability and usability of records throughout the life cycle of records.

C&T supports Hong Kong Airport Authority to provide safe, secure and efficient international airport service to all passengers

With over 10 years' experience on system development and maintenance service with Hong Kong Airport Authority (HKAA), C&T has recently been awarded another two - year framework contracts from 16 July 2014 to 15 July 2016 with an option to extend for a further one year to continue serving the prestigious long-term customer. Under these new contracts, C&T will continue to provide development and maintenance service to the users of HKAA for their corporate systems and airport systems respectively aiming to support HKAA to provide safe, secure and efficient international airport service. These awards once again reaffirmed the recognition of our competency in delivering high quality IT services, and our strong domain knowledge in airport applications.

Hong Kong International Airport provides safe, secure and efficient international airport service

Under these new framework contracts, we will continuously provide HKAA with various professional services not only to support their airport operations including the airport management, airport data control/ flow, baggage handling, passenger flow and airlines management, but also to develop, enhance and support those applications or platforms which support back office operations, financial management and internal administration of the Airport Authority.

Business Highlights

Water Supplies Department applies C&T's solutions to ensure high standard service delivery

In order to enable WSD to provide a cost-effective and high-quality water services to Hong Kong, C&T Solutions upgrades hardware and the related services for migration of SAS reports for the Customer Care and Billing System (CCBS) of Water Supplies Department (WSD).

(Source: WSD website)

The CCBS is a system developed by C&T Solutions for WSD to support their core operations in customer services, billing and metering activities, order management, electronic document management, workforce management and data mining.

Water Supplies Department applies C&T's solutions to ensure high standard service

In this upgrade, C&T added storage to the IBM V7000 Storage Server, migrated SAS reports to the CCBS Monthly Report Database Server, enhanced CCBS, managed the enhancements service and kept the new equipment in proper order to ensure the service delivery of WSD continuously in high standard.

New Projects under SOA-QPS3 helps Hong Kong SAR Government to strengthen security protection

C&T provides advanced IT solutions including feasibility study, system implementation and maintenance, network support services, security risk assessment and security monitoring services, independent testing services etc. to various Government departments. In this quarter, C&T has several opportunities to strengthen security protection of various departments / bureau of the Hong Kong SAR Government such as Drainage Services Department, Education Bureau, Highways Department, Leisure and Cultural Services Department and Efficiency Unit.

Leisure and Cultural Services Department

Highways Department

Our Security Team is delighted to work for various Government departments. We look forward to cooperating with other government departments and contributing our solid experience and knowledge to create a better future for Hong Kong.

Business Highlights

IPL HRIS gains more accolades (Q2 2014)

C&T is proud to expand our customer base and signs more IPL HRIS contracts last quarter to demonstrate our market-leading position in Hong Kong again. The following are few of the contracts contributed by a large international law firm, Guardforce (Macau), Hong Kong Sanatorium & Hospital and the multi-national footwear company.

A large international law firm manages its human capital effectively

C&T's client reduces cost and increases the operational efficiency and effectiveness by using C&T's IPL HRIS.Net Core system.

With more than 20 years of experience in implementing human resources management (HRM), C&T successfully signed a contract with one of the largest and longest-established law firms to deliver high standard HRIS.Net Core system.

Benefiting from the HRIS.NET modules of human capital and administration management, payroll, leave management and iLeave, their operation cost was not only reduced, their administrative tasks also become more accurate and consistent, and their entire employee lifecycle could be managed effectively.

The operation efficiency of Guardforce (Macau) is uplifted by IPL HRIS Core System

Leveraging our successful track records and well established partnership with Guardforce, the security services market leader has recently extended their usage of IPL HRIS Core System to cover its Macau operations.

Guardforce (Macau) has recently implemented our human capital, leave management, payroll, attendance and iLeave modules to save its time and cost. Guardforce (Macau) will benefit from the plenty of easy-to-use functions being enjoyed by other affiliates of Guardforce in eliminating tedious clerical work, and responding quickly respond to both management and employee requests.

Business Highlights

C&T's HRIS contributes to Hong Kong Sanatorium & Hospital's employee's development

Hong Kong Sanatorium & Hospital has chosen to use our market-leading human resources management and payroll application system.

Through our HRIS, their HR manager can manage their employee records and payroll as well as examine the related data and extract the most business value of the workforce.

Hong Kong Sanatorium & Hospital also makes use of our IPL Training module to allow training managers accessing any participant quickly and immediately, enable him or her to see the individual's training activities, training needs and training program. Their managers can keep track each staff's current activities and training history, and list out the class or other activities that the employee needs to facilitate long-term development planning of each employee.

Multi-national Footwear Company chooses IPL for workforce scheduling solution

IPL HRIS has been traditionally strong in the apparel market for its adaptability to fit the challenging needs of this industry. With more than 20 years of experience of serving this market segment and numerous success cases in many large global apparel companies, IPL has gained the confidence of a multinational footwear company to implement an HR solution back in 2012. With the satisfactory implementation of that system in 2013, this global footwear company has once again entrusted IPL to implement a workforce scheduling solution for it.

The workforce scheduling solution to be implemented is based on IPL's award winning IPL Attendance and iAttendance Systems. The system simplifies the users' tasks in setting rosters for their employees and automates the payroll calculations based on the actual attendance of the staff. Using the system, the line managers will be able to review and approve the attendance records online, hence do away with the old manual reviewing and signing on paper. Not only does it more environmental, it helps save a lot of the line managers' time in checking the attendance against the roster, as well as the time of the HR department in calculating the payroll adjustment based on the attendance variance. Together with IPL HRIS system's full built-in support of daily average wage ordinance and the minimal wage ordinance, such attendance variance will also automatically be taken care to comply with these regulations.

Business Highlights

Orix Asia fully enjoys the benefit of C&T's EIMS

Orix Asia has been a Vitova's long term customer since 2006. This is a good reference case to prove our "Think Big Start Small" implementation strategy and it helps customer obtaining the benefit of e-filing solution in short period of time.

In 2006, Orix switched from a legacy proprietary filing system to VitalScan mainly because the deployment could be completed within 2 months. Also, the system was simulated with Physical Filing Cabinet which general admin staff was easy to adapt.

The staff of Orix Asia Ltd fully enjoy the benefit of C&T's document management solution

After several years of using VitalScan, the customer was seeking advanced features of document management solution such as email filing and electronic approval. This offered a good opportunity for Vitova to upsell customer to the added-value and advance features of VitalDoc Enterprise Document Management System. The upgrade was completed in July. Now, the customer enjoys not only the benefit of electronic filing but also the improved efficiency in approval process.

Events & Partnerships

Showing C&T's excellent competency on HRM solutions in International Soft China 2014 in Beijing

Receiving the award from Mr. Daniel Lai, BBS, JP the Government Chief Information Officer of HKSAR

C&T exhibited our flagship HRM product in the International Soft China 2014 in Beijing Exhibition Centre from May 28 to May 31, 2014 with attendance of around 80,000 guests and exhibitors from over 20 countries.

Events & Partnerships

Being a 3-consecutive year winner of the China Outstanding Software Product Award, IPL HRIS was invited to exhibit at the exhibition to show case our advanced HRM solution to industry leaders and high ranking government officials in PRC.

Mr. Edmund Lau, President of North Asia of the Group said, "Our success and continue efforts has been recognized by this international campaign, and it is a tremendous honor to receive this award from Mr. Daniel Lai, BBS, JP the Government Chief Information Officer of HKSAR."

Official launch of the first-ever Security and Guarding Services System in Hong Kong on cloud platform

Official launch of the first-ever Security and Guarding Services System in Hong Kong on cloud platform

Last year, C&T was entrusted by the Chamber of Security Industry ("CSI") to implement the Security Cloud which is the first Security and Guarding Services System on cloud platform and mobile devices in Hong Kong. The project was funded by the Sector Specific Programme of the OGCIO.

The Security Cloud system was official launched on 8 May 2014. Over 100 guests attended the press conference including industry leaders in security and guarding services, property management and parking management.

The Security Cloud system makes use of GPS, Cloud computing and handheld devices to provide an innovative teleprotection system for end-user anywhere within Hong Kong to manage the teleprotection, attendance of guards, patrolling and incident reporting. Moreover, the system allows security personnel, especially those manning remote to report that they are safe in workplace.

The system helps companies in security service industry to improve the staff safety and operation efficiency. The system is developed as Open Source Software and hence the source files are available to download for free at CSI website. This project provides a cost effective, secure and stable platform to the industry.

C&T's Grand Opening followed by movie show to encourage work-life balance

Party to celebrate C&T's Grand Opening followed by movie show

To celebrate C&T's Grand Opening and to maintain a work-life balance, an opening party was held with roast pork cutting and refreshment food and drink. It was followed by a movie show in Cyberport cinema with over 160 C&T colleagues and their families watching the 3D movie "Transformers: Age of Extinction". Both events completed successfully, and all guests enjoy both events very much.
